NOTE: This calendar may contain multiple versions of the same month. This is in case that month's moon sighting is off. Throw out the version of that month that has the wrong moon sighting. This does not mean that months without an additional version are for sure based on an accurate projected moon sighting.

- 1st day of each month – Determined by new moons that are projected to be at least 3% visible, or in the case that 30 days have been fulfilled. If a new moon is sighted and that sighting is contradictory to this calendar, the sighting of the new moon holds sway over this calendar**
- Feasts are dated in agreement with Leviticus 23 and other supporting verses within the 66 book canon of Scripture.
- High Holy Days are in **BOLD**. Note: some Holy Days that are NOT High Holy Days also are in bold. Purim, Hanukkah, and other optional Jewish fun days are not noted on this calendar. You are encouraged to note those yourself and enjoy Hebrew culture while esteeming your brothers more highly than yourself.
- The Counting Of The Omer starts with First Fruits. Every Weekly Sabbath has it's corresponding Omer number noted on your calendar, counting seven full Sabbaths (weeks, 49 days) until reaching the 50th day: The Feast of Weeks!***
- Days begin and end with the sunset. Sunrise is roughly the halfway point of each day.
- Gregorian Calendar days are noted on:
 - The beginning and ending of each Gregorian Month
 - The beginning and ending of each Hebrew Month
 - Every 1st Day
 - Every Feast Day
 - Another day of importance

**Moongiant.org – these projections are not actual sightings, but calculations projecting what percentage of the moon will be visible on what day. Actual visibility from this source is accurate within 1 percent; However, the visibility percentage available to the naked eye varies based on the sighter's location, the sun's location in relation to the sighting location, and the moon's location in relation to both previously mentioned. Other factors such as visibility levels, cloudiness, and the moon's path in the sky also come into play during an actual sighting. This calendar has used Moongiant for 3 full years and has not been off by more than 36 hours insofar as I can recall. RenewedMoon.com is a good source for current worldwide sightings.

Counting The Omer: This way of Counting The Omer is new to me, and is being brought to my attention through prayer. Brother Judah is generally theologically correct on several of the issues of utmost importance except when pertaining to Yeshua being Messiah and some much smaller idiosyncrasies of the law. It is to be brought into consideration that The Almighty has left brother Judah responsible for His oracles and that he has taken that responsibility more seriously than any other people group has ever taken any responsibility in the history of everything. For this reason I am considering this method of Counting the Omer. Not for his sake, but because I believe it is the way Elohim intends for His Event: The Counting of The Omer, to be performed. This method is supported by the writings of the Targamum*. Also, the writings of Josephus**** describe this counting as being the method brother Judah has been utilizing for millennia. I am unsure of this method's accuracy. For further information refer to the free YouTube videos found when searching "Tony Robsinson The Counting of the Omer"****. **NOTE: IT IS YOUR RESPONSIBILITY TO PRAY, RESEARCH, ASK QUESTIONS, AND HAVE ADEQUATE FELLOWSHIP THAT WILL AID YOU IN FINDING THE PATH THAT YHVH INTENDS FOR YOU TO WALK. MEETINGS WITH HIM IN THE CONTEXT OF HIS FEASTS AND SABBATHS ARE THE MOST IMPORTANT PART OF THE LAW FOR WHICH HE INTENDS FOR YOU TO FOLLOW. EXPECT FOR IT TO BE DIFFICULT AND FIND CHARACTER THROUGH TRIBULATION.**

In Yeshua The Mashiach be blessed and find favor in both the eyes of men and The Father.
